FEDERAL MINE IS

This, Among Other Beaver Properties, Is Rapidly Coming to the Front.

BIG COPPER ZONE NOW BEING DEVELOPED

Indications Are That Mine Will Be Paying Within a Few Months.

firecial to The Tribune. MILFORD, Oct. 28.-In the Beaver Lake district there are many promising mining properties. The O. K. has already given a good account of itself and has the record of producing a greater ore value in copper on the 200-foot level than any mine in the State in the same area of space. Developments in this, as in other mines in the district, demonstrate that the ore enlarges and enriches as depth is at-tained.

Federal Is Good.

A short time ago a representative of The Tribune visited the Federal Gold Mining company's properties, situated in the heart of the mineral-bearing belt of Beaver Lake district. This property is located about ten miles north of the Horn Silver mine on the same ore belt and is surrounded by the O. K. on the east, distant about three miles, the Black Rock, Skylark and Wasatch King, a short distance to the east.

Developing the Ground.

The company keeps a force of men at work in the development of the property and certainly the results as shown ought to be most gratifying to the stock holders. The shart now being sunk at a depth of seventy-five feet is all in mineralized matter and gives evidence that great ore bodies will be encountered at no great distance. The company has recently put in machinery for the purpose of hastening work with all possible speed and with a view to economical development.

Reaching Ore Bodies.

An incline shaft or tunnel is being driven to tap the ledge on the shaft, which in early days was sunk to a depth of about sixty feet, and from which the then owners extracted and marketed over \$100.000 worth of ore. The ore was found in a deposit formed in the shape of a demijohn. At the bottom of this shaft is found rich sliver, lead and copper ore in places indicating that this tremendous ore vein or pocket continues down, with what results development alone can disclose.

Has Good Formation. It is for the purpose of tapping this vein at considerable depth that this tunnel is being run. The formation throughout is porphyritic lime with a solid lime foot-wall.

wall.

In one of the adjoining claims in this company's properties a new strike has been made at a short distance below the surface. A twelve-foot ledge has been uncovered, the ore of which averages 10 per cent capper.

Much Interest Aroused.

The active development of this property is a source of much interest and concern to the mine-owners of the district and the indications that the Federal company will be a great paying producer within the next few months tends to emphasize their faith in the district and give encouragement to greater efforts benceforth. Has Good Backing.

The Federal is officered by some of Salt Lake's prominent capitalists and Eastern men of wealth.

Its financial agent Mr. J. E. Meyer, has recently returned from the East and has succeeded in placing the company on a firm financial basis. From present appearances the Federal Mining company will occupy a place among the dividend-payers before the expiration of 1866.

SAN FRANCISCO MARKET.

Considerable Selling by Small Holders of Nevada Stocks Is Noted.

ers of Nevada Stocks Is Noted.

The San Francisco correspondent of James A. Polleck & Co. thus reviews the week: "Very little of special interest transpired in the Tonopan, Golditeld and Bullfrog mining situation during the week except a good strike was made in the West End at Tonopan and the Gold Barmine at Bullfrog. There has been considerable liquidation going on in many of the properties. Securities in the different companies have been coming mostly from small holders, who find their wants requiring funds. This condition may cause some further decline. The great drawback at present may be charged up to the smelting and railway conditions, which prohibit marketing ore of less value than \$40 per ton.

"The big mines are content to wait a re-

"The big mines are content to wait a reduction in rates before parting with their ores. They figure out the value in there and they are only losing the interest on their products, which will ere long come back to them ten-fold. Would advise buying the gold stocks with a view of holding them for a good advance, which will surely come and will pay handsomely those who have patience."

READY FOR BUSINESS.

Lucky Dutchman Company Organizes to Work Nevada Ground.

to Work Nevada Ground.

The Lucky Dutchman Mining and Development company, with a capital stock of \$12,690, divided into shaces of the par value of \$2 cents each, filed articles of incorporation in the office of the County Clerk Saturday.

The officers of the company are: W. I. Suyder, president, John W. Royer, vice-president; H. B. Cole, secretary and treasurer. These, with W. H. Child, R. S. Wimmer, B. O. Atkins and C. E. Anderson, constitute the board of directors.

The company owns the Climax 1 and 2 and the Knob Hill claims, in the Crescent mining district of Nevada, and also an option on the Lucky Dutchman, Wyoming and Mammoth claims in the same district.

Hornblower & Weeks's Copper Letter. BOSTON, Mass. Oct. 28.—Royale was the feature this morning, continuing the advance started yesterday afternoon, on peceipt of large buying orders from Lake, accompanied by rumors that the Baltic lode had been intercepted on this property. Stock opened at 274 this morning and quickly advanced to 27%. Boston Conwas again well bought and advanced to 12%. North Butte was inactive, but strong. Copper shares generally were well bought and show a good undertone.

New Mining Company.

With a capital stock of \$100,000, divided into shares of the par value of \$1 each, the Lost Packer Extension Mining company has filed articles of incorporation in the County Clerk's office. The officers are: W. W. Chishoim, president; J. C. Pierce, vice-president; G. P. Chisholm, secretary and treasurer. The company owns a group of claims in the Loon Creek district, Custer county, Idaho.

Articles Are Amended.

The Great Northern Copper Mining company, an Ogden corporation, has filed amended articles of incorporation in the Becretary of State's office, increasing its capital stock from \$100,000 to \$1,000,000. The par value is \$1 a share.

Shipments of Ure.

The Piener sampler reports the receipt of two cars of ore from Rienham, three cars from Alta, and one car from Nevada. Taylor-Brunton are in receipt of six cars of ore from Rienham, three cars from Tintle and five cars from Bingham.

CARRIES ORES LONG WAY WITH MULES

Mining Man From Mexico Tells of Many Difficulties That Hinder Work.

W. H. Cox, well known in local mining ircles, who has been, during the past year superintendent of the Jesus Maria mines of he United Mines company, operating in El Carmen district, Durango, Mexico, is in the city, en route to Butte, where he goes to take charge of one of Helaze's big prop-

Work in Primitive Style.

Of the work at the properties over which he has had jurisdiction, Mr. Cox says that only the richest ere could be handled, as the rock had to be carried 125 miles on the backs of mules before a relirend station affording an quitet to a smelter could be reached, a condition that made it imperative to handle no ores carrying less than 150 cunces silver ter ton.

Will Soon Have Road.

read is new building which will come hin thirty miles of the property and with a completed. Mr. Cox is certain that the trict will experience a period of great deopment and prosperity. The country is he declares of wonderful mineral richis, which must yield large profits when capils in invested on a large scale.

SETTLEMENTS ARE LARGE.

Record of Ore and Bullion Product Holds Up Well.

Ore and builton settlements for the week Ore and bullion settlements for the week ending yesterday were well up to the high record of the provious week, the total amounting to \$544,000, while the figures for the day came in at \$108,000, divided according to figures reported by McCernick & Co. as follows: Gold, silver, lead and copper ores, \$65,700; base buillion, \$42,500.

In the metal market silver weakened one point, selling at \$65% cents per ounce, copper remained at \$6 cants per pound for easting and \$15% cents for electro, while lead was unchanged at \$2,500,455 per cwt.

THE WEEK ON 'CHANGE.

Trading Has Been Active, With Columbus Con. the Feature.

The week on the Salt Lake stock and The week on the Salt Lake stock and mining exchange closed with the transfer of 131.183 shares, for which buyers paid out the sum of \$69.522.62, a creditable showing in which the open board trading contributes by far the larger end of the cash total. For the single call of the day the record shows that 11.212 shares were sold at a market price of \$5.973.18, with Columbus Con remaining as it had throughout the week, the most active of the stocks.

the stocks.

Asido from the decline in Columbus Con, which under heavy selling, said to have been brought about by the release of large blocks of stock held as security by local bankers, and which has dropped from better than \$2.50 to \$2.10, the market has witnessed no startling changes. Dally-Judge has climbed to \$6.50, Wabash is weaker, while the active Tintle stocks, including Uncle Sam, Star Con., Ajax and Lower Mammoth show little change. The day and week closed with quotations and sales as they follow:

COKE FOR PLANTS MAY BE SECURED

Smelters Are Getting Some From Outside Points and Situation Improves.

PART OF THE OVENS WILL BE KEPT GOING

Fuel Company and Railroad Making Great Efforts to Keep Up Supply.

With the Rio Grande and the Utah Fuel company straining every nerve to prevent the coke supply of the valley smelters from being shut off by the destruction of the coke crushing plant of the fuel company by fire Thursday night, the situation yesterday had brightened some and there was a more hopeful feeling among the heads of the big companies which con-tribute so largely to the payrolls and prosperity of the valley.

Getting in Some Coke.

According to official statements from the Rlo Grande the road expects to be able to furnish to the smillers from outside points from 20 to 30 tons of coke daily beginning in two or three days, which is about 50 per cent of the normal amount used by the plants. This, with the reserve on hand will keep the plantsgoing, at least in a limited way, until other arrangements can be perfected.

Some Ovens Busy. Until such time as a new crusher plant can be installed, which by the exercise of every means at hand, may be accomplished in thirty days, such of the product from the Sunnyside as can be burned without crushing will be converted into coke and this will to some extent relieve the shortage. he shortage.

TO DEVELOP OLD GREELEY.

Boston Company Will Work Long-Idle Claims of Bingham.

Idle Claims of Bingham.

Walter B. Farmer, treasurer of the New England Bolt and Nut company of Boston, and Fred C. Smith of Sait Lake City arrived from Boston today, says the Bulletin of Bingham, for the purpose of conferring with R. L. Booth of Bingham Junction and arranging for the development of the holdings of the Bingham Group Mining company, consisting of the old Gresley-Sacred group, which includes the Mountain Gem No. 2. Horace Greeley Croesus and Sacred claims in the West Mountain mining district, Bingham.

The history of these claims in the last thirty-old years has been uniform in the fact that whenever worked they have produced high-grade ore in paying quantities, although worked by the simplest hand process. Some three years ago H. L. Booth secured a bond and icase option, which resulted in the organization last July of the Bingham Group Mining company, capital slock 150,000, with Messrs. Booth, Farmer, Smith and several other Restonmen of wealth now interested, who propose putting in an up-to-dete equipment, increasing the force of men and enlarging the output. Recently arrangements have been completed by which this company has secured the use of the British tunnel, through which it will operate on the 100-foot level, taking ore from the Greeley vein.

BIG SALE OF STOCK

Shoshone National Prepares for Development Work.

Velopment Work.

G. G. Rice has sold, through his Eastern connections, 20,000 shares of treasury stock of the Shoshone National Bank Mining company of Huilfrog. The sails was made by wire and the whole block was taken by one party. The company's treasury now shows a big surplus of cash and development work will commence in dead earnest. H. J. Reilly, the lucky leaser, is president of the company. John S. Cook, the local banker, is treasurer. The company's ground adjoins that of Peery's Montgomery Mountain Mining company and the Schwab-McKate property, known as the Crystal Bullfrog.

CONDEMNATION SUIT FILED.

Mining Company Institutes Proceedings Against Lundberg and Wife.

The Boston Consolidated Mining company has instituted proceedings in the Third district court, having for their object the condemnation of certain property at Bingham. It is alleged in the complaint that Francis O. Lundberg and wife have the surface rights to the property, which is being used for residence purposes and, as the mining company needs it for milling purposes the court is asked to condemn it. The company also asks that it be permitted to occupy the premises pending final determination.

Busy at New Utah.

Tim Manton says that the heisting plant Tim Manker says that the heisting plant which was recently moved to the New Utah property in the Ericson district is now in place, and as soon as the new sinking pump arrives work will be started. The pump was ordered some time ago, but it could not be secured at Sait Lake, and consequently there has been a delay. The New Utah property recently formed the basis for a new company, the stockholders being Utah and Colorado mining men. Mr. Manion represents the Colorado interests and will personally look after the development of the ground, which is among the rest promising in that section.—Eureka Ropetter.

CALIENTE STRIKE NOT AS STATED

Story of Fabulous Values in Gold Ore Prove to Be Unfounded.

Epecial to The Tribune.

CALLENTE, Nev., Oct. 28.—The reported rich strike made at Antelope canyon, about two miles north from Callente is a canard. While L. F. Peer reported findlog a rich piece of ore in that district, Dr. E. R. Keen stated this morning that he had neither found nor located any fabulously rich ground nor had he found any rich ore in the locality of the resported strike. There is no excitement here over the reported find nor is the town in anything but its normal condition from a prospecting standpoint. A few locations were made on the strength of Mr. Feer's report, but as the whole surrounding country is mineralized with low-grade ore and as the locality referred to has been relocated dozens of times for the past thirty years, it is not anticipated that anything of a sensational nature will be found in the district.

Deal in Chief District ing a rich piece of ore in that district, Dr.

Deal in Chief District.

Deal in Chief District.

A deal is on between Callente mining men and the owners of a group of rich gold-sliver claims in Chief mining district, north of Callento for acquiring the properties at an early date.

A recent decision was handed down by Judge Brown of the District court convened at Floche, invalidating the owner-ship of mining claims by Deputy County Surveyor Cook, who located several claims near Floche while in the service of the Government as Deputy Surveyor, the court holding that United States Surveyors and their deputies cannot legally locate mining claims while serving in such official capacity

Strike Near Salt Lake Route.

Strike Near Salt Lake Route.

A rich strike is reported in Pennsylvania, mining district, twenty-five miles from Callente, near the line of the Salt Lake Route in the Winter's Dream group of silly ver claims, where a twenty-five-foot body of manganese and horn silver has been opened up at a depth of 199 feet in an incline shaft showing values as high as 1450 ounces silver per ton. The property is owned by Gus Fletcher of Manti, Utah, and no work has been done until recentily on the properties, which have been relocated dozens of times during the past twenty years. twenty years

Find Some Gold Ore.

Fred Bulmer and Nat Leonard of Cripple Creek, who have purchased the Mid-night group of claims on Virginia river, south of Callente, have just struck a three-foot vein of gold going \$194.10 per ton in their tunnel at breast in 245 feet and are now drifting or the vein. are now drifting on the vein whidening with every foot of work,

Mining Notes.

The Great Northern Copper company of Og-den has increased its stock to \$1,509,500. Freed Richmond, bend of the machinery de-partment of the Sall Lake Hardware com-ton, reports beavy shipments of machinery to Fly. Nev.

Joe Oberndorfer, who is back from an in-spection of the Chiquita mine, Good harings district, says that a fine body of silver-ned ore is being developed in the liceaser, an ad-joining property.

Superintendent Edmunds of the Copper Glance at Bingham is here, busy sending up supplies of all sorts in quantities sufficient to carry on an aggressive campaign suring the winter. Good progress in being made in the tunnel, which is now in 300 feet.
